

OctoCell-V™ Stacked Tray De-Gritter

Divide and Conquer!

Indexed flow control maintains velocity! Velocity control optimizes operation and reduces overflows and clogs.

Join our owners in Texas, who share our vision for reduced operator attention with our upgraded process approach through consistent dividing and conquering grit!

Process Function

- Controlled loading with indexed headbox.
- Most proven process flow.

Technology Overview

- No moving parts.
- Proven down flow process design with over 1,500 units in operation in the USA.
- FRP or stainless-steel tray options.
- Easily combined with grit classifiers.
- Minimizes footprint.

Corporate Ownership

- Same Owners for 45 Years

OctoCell-V™ Grit Removal technology pioneered and patented by **Envirodyne Systems Inc.**

Vision Equipment has installed ESI equipment at **60+ Texas wastewater treatment plants**, supporting municipal facilities across the state with proven grit removal solutions.
